PROFILE

Engineering student building full-stack applications and Linux tools. I work across Go backends, React/Svelte interfaces, and declarative Nix configurations, with a focus on reliable automation and testing.

EDUCATION

Moroccan School of Engineering Sciences (EMSI) **10/2025 – Present**

Computer Science and Network Engineering – Rabat

OFPPT **09/2022 – 07/2024**

Specialized Technician in Digital Development, Web Full Stack

PROFESSIONAL EXPERIENCE

Software Engineering Intern – Nibiru Consulting **08/2026 – 09/2026**

Rabat, Morocco

- Owned the design and Go implementation of Eden ↗, a YAML-configured JSON pipeline engine; a local end-to-end benchmark reached 53,867 messages/s with one transformation.
- Built graph validation, conditional routing, transformations, and bounded workers with backpressure and graceful shutdown; 34 named tests pass with the race detector.
- Exposed 2 custom Prometheus metrics and liveness/readiness endpoints; set up a Nix CI gate for formatting, tests, go vet, build, and workflow lint.

Full-Stack Developer Intern – ONEE **03/2024 – 04/2024**

Fès, Morocco

- Built ParcAuto ↗, a Laravel, React, Inertia.js, and MySQL fleet management app for tracking vehicles and operations.
- Delivered vehicle workflows, data import/export, operation history, and a supervision interface.

TECHNICAL SKILLS

Languages: Go, TypeScript/JavaScript, Bash, Lua, C++
Backend: Laravel, Django, SQL, MySQL, REST APIs
Frontend: Svelte, React, Capacitor, HTML/CSS
DevOps/Observability: NixOS, Home Manager, Git/GitHub Actions, Prometheus, Docker, Podman

Practices: Linux/Bash, unit and integration testing, automation, event pipelines

MAJOR PROJECTS

Pulse – Offline Workout Planner ↗

Stack: Svelte, TypeScript, Capacitor, Android

- Solo project: built and released an offline-first workout planner with 72 exercises, muscle maps, per-set tracking, JSON backups, installable Android and web builds, and no accounts or analytics.

homeconfig – Declarative Linux Setup ↗

Stack: Nix, Home Manager, Linux

- Maintain 58 Home Manager module files for SSH, Podman, developer tools, and desktop setup in a flake with 2 home configurations.

projectorctl – Safe Hyprland Display Switcher ↗

Stack: Shell, Nix, Hyprland, Quickshell

- Solo project: built a CLI, Quickshell panel, and Home Manager module for 3 display modes (private, mirrored, extended), with automatic audio switching and fail-closed recovery when a display disappears or verification fails.
